Online viva to benefit PhD students

UGC has directed HEIs to conduct viva and interviews through video-conferencing

e-Aditya.Wadhawan

The University Grants Commission (UGC) in a recent directive has directed the Higher Educational Institutions (HEIs) to consider conducting viva-voce and interviews of PhD students in an online mode through video conferencing. The university regulator has advised that the institutions may use Google, Skype, Microsoft Technologies or any other reliable and mutually convenient technologies for this.

Speaking to *Education Times*, Lakshmi Arya Thathachar, chairperson, Office of Doctoral Studies, RV University, Bengaluru, says, "The decision to conduct viva-voce for PhD students is a welcome gesture by UGC as it would be convenient for working professionals who pursue part-time PhD programme. They will be exempted from the encumbrance of travel and lodging costs. More importantly due to this, more people would listen in to the viva irrespective of their physical location, thus making the process of knowledge-production more public and participatory."

The move to an online mode bodes well for the future and enables greater participation in higher education. Also, moving to an online mode makes it easier for working professionals to pursue doctoral studies while being employed at the same time. "The first cohort of PhD students in 2021-22 will take online entrance examination and viva. The duration of viva would be of one hour," adds Thathachar.

Yogesh Singh, vice-chancellor, Delhi University (DU), says, "The recent decision of UGC that has mandated online viva-voce for PhD is a welcome step and the students are also affirmative about this decision. We have been conducting viva-voce of the students for quite some time and there is no massive difference between the physical and online modes."

With online mode, inviting international experts for examining the students during viva will be possible and this will make the evaluation process qualitative, adds Singh.

7. Vice-Chancellor's Message

"We want that education by which character is formed, strength of mind is increased, the intellect is expanded, and by which one can stand on one's own feet." - Swami Vivekananda. This is a very profound message from one of our finest spiritual gurus on the kind of education required in India and elsewhere. The Trustees of Rashtreeya Sikshana Samithi Trust (RSST) deserve to be applauded for their steadfast efforts in the field of education over the past eight decades and for taking a historic step by establishing the RV University. The RV University aspires to be a world-class university known for academic and research excellence, diversity, international collaborations, inter-disciplinary studies, sustainability, social commitment, and community engagement. In addition, RV University wishes to be a responsible, ethical, and collaborative partner to industry, government and other organizations to create a better world. We want to create an institution that can provide quality education at an affordable cost. We have, therefore, recruited excellent faculty members and non-teaching staff to inspire generations of students to come. As a part of our launch efforts, we have approached various dignitaries for a message for publication in this volume. We are pleasantly surprised by the warmth of many constitutional and statutory authorities, legal luminaries, academics and captains of industry. The alacrity with which some of them have responded is indeed laudable. We sincerely thank each one of them. We in fact deem the message of these stalwarts as a true blessing. We are greatly enthused by these inspiring messages even as we embark on a long journey. I hope this publication will serve as a constant reminder to all of us as to the lofty standards that we have to attain in the years to come. I wish to sincerely thank the President, office bearers and all Trustees of RSST for their unstinting support in our endeavors. The small seed that they have planted today will, over the years, become a mighty tree and provide excellent learning opportunities for thousands of students. It is our sincere wish that these students will build a "New India" and make all of us proud.

11.1 School of Liberal Arts and Sciences (SoLAS)

The School of Liberal Arts and Sciences (SoLAS) at RV University offers dynamic programmes with a vision to cultivate a comprehensive knowledge base in a subject discipline of the student's choice, while simultaneously developing requisite skills that will transform them into future leaders, creators, and influencers. Our team of outstanding faculty, from some of the best universities in the world, inspires students to carve their own academic pathways based on the learners' interests through an eclectic integration of courses from Natural and Social Sciences, Arts, and Humanities. It is a truly modern curriculum that is designed for young learners to develop a research-based, multidisciplinary thinking ability. Of all tested and available higher education templates prevalent in India today, the Liberal Arts and Sciences study model comes closest to the pursuit of the ideal of 'human flourishing'. Courses at SoLAS align with the plural, all-encompassing spirit of the Indian civilization, with cherished European renaissance worldviews of 'humanism, individualism, secularism, skepticism, classicism, and well-roundedness towards the nurturing of freethinking, responsible, global citizens in a fast-changing world.

The future of education is creative and visual, and the processes of skill acquisition, performative and experiential, with a skew toward learner mindsets that are explorative and liberal. 11.1.1 Research Centres

1. Centre for Visual & Performing Arts

A study of the arts – music, dance, theatre, films, and visual arts – provides the historical and cultural perception of a country. Art is not insular but is profoundly impacted by the socio-political happenings of society. Studying art, therefore, not only holds clues to the past but has keys to handling the future. How people and society in different periods of time want to be remembered also embodies art practices. A study of the Arts is a study in sociology, history, politics, and philosophy. By its very nature, it is interdisciplinary.

The collaborative nature of Performing Arts provides students with opportunities to engage the mind, body, and emotions. It helps them discover their own voice, develops confidence, and encourages them to act as ethical and responsible participants in citizenship. While the arts themselves overlap each other, it is also a study of histories, geographies, anthropologies, linguistics, cultural studies, feminisms, politics, and patronage. How all these coalesce into creating the creative is a fascinating experience. Today, with technology at its peak, performing arts has entered an exciting phase – it offers new possibilities and provides access to the past and memory like never before.

The Centre is interested in the knowledge systems that constitute the Arts as well as practice-based research. It aspires to focus on socially relevant and participatory practices and encourages projects that investigate the nature of art and society. For instance, Kuchipudi's origins in a spiritual tradition, the coming together of activism, poetry, and musical traditions in the ghazal, the diverse traditions of theatre that stemmed from mythology, religion, folk, politics, and contemporary issues – the world of creative encounters the real.

2. Centre for Sustainable Development

The main objective of the masters Centre for Sustainable Development (CSD) is to incorporate knowledge from the biophysical and social sciences to better understand and engage with societal issues pertaining to the environment and development.

It is widely understood today that environmental issues cut across disciplinary divides. Thus, understanding and studying them, as well as educating a new generation calls for disciplinary and cross-disciplinary perspectives and openness to the varied frameworks, worldviews, and values about the environment. Furthermore, environmental conservation goals are often tightly tied to development goals. Thus, environmental science education needs awareness, appreciation, and knowledge about the social context of the environment. The centre looks to advance both the disciplinary and cross-disciplinary possibilities that can promote sustainable development without losing sight of environmental diversity, equity, and social and environmental justice.

Apart from holding activities at the university such as seminars, conferences, and workshops to achieve this end, the center looks forward to building synergies with like-minded stakeholders across academia, civil society, and public and private sectors for education, research, innovation, and action. The Centre stands for values such as trans disciplinarity, environmental diversity, sustainability, justice, inclusivity, and openness to diverse perspectives that will foster intellectual growth, education, and research.

11.4.1 Research Centres

1. Centre for Computational Approaches to Science and Technology

The envisioned center will have multiple divisions, allied student clubs, dedicated faculty, research scholars, and undergraduate and master's students performing societal research. The center will be mandated to give a thrust to student entrepreneurship and application-oriented products. The center currently focuses on a) intellectual property protection (patents, GI, industrial designs, and trademarks); b) drug discovery and new drug development; c) undergraduate student research-games with purpose and d) training & entrepreneurship. All these divisions eventually envision to comprise of teaching assistants, research assistants, research associates, doctoral research scholars, allied faculty across schools, undergraduate students, student clubs, master's students, industry partners, collaborations through MOUs, and offer innovation, entrepreneurship & product development minor, and I&E courses.

Research Divisions

1. **Intellectual property protection (PATENT/GI/DESIGN/TRADEMARK)**

   Any credible invention needs to be patent-protected, and the complexity of invention is increasing daily. In-house capability for IP training, drafting, and protection is needed. Secondly, sections 3a to 3p of Indian patent act 1970 are non-patentable subject matters in India and one of them interest to this group is section 3(k), the software inventions per se. The societal division of this will take up the Geographical indication (GI)-based community empowerment and outreach, and create empathy for India, its culture, and the need to empower fellow Indians through GI products. This division will be the single point of contact for entrepreneurs' IP needs.

2. **Drug discovery and new drug development**

   Computational chemistry through methylene-linked molecules is the hope for the future. This division identifies possible combination drugs for evolving pathogens that comply with sections 3(d) and 3(e) of the patent act of India. The herbal & natural products of Indian origin will drive medical research of next century and there is increased consciousness of moving from active molecule isolation to possibility of natural product formulation either through food or herbal supplements. The current small molecule drug discovery lacks tools for in silico evaluation of herbal formulations and there is a strong need for combination molecule evaluations. Also, the herbal formulations need to be reasoned and interpreted for activity and the machine learning and deep learning tools could interpret and identify new formulations for existing as well as newer health challenges. Anti-aging formulations and "Cleopatra" perfume are of interest to this division.

3. Undergraduate student research

This division focuses on breaking down complex problems into research that undergraduates can find interest in, conceive, be amenable to, and complete with a purpose or role for society. Games with purpose will be the pedagogical approach and look to build the capacity of entrepreneurial mindset among students. The division aims to promote faculty-student interaction for research, building a culture of problem discussion, rapid prototyping, adopting lean start-up strategies, adopting open-source projects, identifying specific external domain experts to guide projects, etc. The team imparts these techniques through gaming and gaming-based pedagogy and pushes students to aspire to deliver products in a minimalistic time. The team essentially innovates on pedagogy for technical entrepreneurship and looks to build a technical entrepreneurial support system for students.

4. Training & Entrepreneurship

India needs technology entrepreneurs at various levels, and building entrepreneurial skills at our university is a necessity that could serve as a differentiator. This also necessitates a focus on the creation of research & training facilities for Sc/ST students and evolving new research-driven opportunities for rural students. This center will invest 25% of its time in capacity building for students, scholars, and faculty, conducting external training and consultancy, and in due process, creating enough intellectual capability to produce successfully trained manpower and entrepreneurs stages of empathy, definition, ideation, prototype, and final testing. One of the initiatives is called "Counseling by Panchatantra," wherein students articulate a story for educational purposes and enable the generic sharing of knowledge regarding emotional, personal, career, and behavioral challenges that teenagers face during their studies.

2. Dhee Center for AI and Data Science

Dhee Center is an interdisciplinary research and education center focusing on the study, development and applications of advanced computational and statistical methods to extract knowledge and insights from large and complex data sets.

This involves developing algorithms and techniques in the fields of data mining, data visualization, and machine learning. including deep learning, computer vision, natural language processing, and reinforcement learning, and organizing conferences to disseminate the research results.

The academic focus would be on designing and developing curriculum and courses for:

- AI/ ML specialization courses for BTech Computer Science
- BSc Honors Data Science
- Minors in Data Science/ AI for degrees other than Computer Science and Data Science and degree programmes other than the School of Computer Science and Engineering
- A one-year certificate course in Data Analysis
- A two-year Advanced Post Graduate Diploma course in Data Science and Machine Learning
- MTech Data Science for working professionals.
- Modular master's Certifications by up Grad Campus in Projects and Internships

3. Center for Excellence in IoT and Edge Computing

In the growing and evolving technological landscape, the convergence of IoT and Edge Computing has ignited a revolutionary change with the potential to extensively transform industries and daily lives. To harness the power of the stated topics, the Center of Excellence in IoT and Edge Computing is introduced. This pioneer initiative serves as a nexus where like-minded researchers, industry experts and enthusiasts come together to drive progress in diverse fields such as Edge Computing, Image Processing, IoT in Healthcare, Assistive Technologies, and Computational Offloading. Alongside, AI would be applied as a methodology to bring automation in all the above-mentioned fields.

The center focuses on bridging visionaries, research and development, education and training, industry collaborations projects which offers a collaborative ecosystem, exploring different frontiers, empowering young minds, and cultivating integration respectively.

This initiative contributes to the betterment of humanity in technological advancements by collaboration and research in IoT and edge computing which makes daily experiences more efficient and seamless. Exploring IoT applications leads to improved monitoring, diagnostics and personalized treatments for patients. The focus on assistive technologies helps individuals with disabilities, providing them tools and fulfilling their lives. Image processing contributes to humanity by revolutionizing biomedical research, security etc. by analysis of visual data. Computational offloading improves energy efficiency, performance and security and also improves resource access.

Internships: Internships will be offered to interested students where focused problem definitions will be provided to them. Working on these problems will allow the students to work on a part of a larger research problem and equip them with technical and non-technical skills that are required in industry and academia.

4. Centre for Distributed Systems

- Enhance our understanding of production quality distributed systems and challenges faced in such systems.
- Enhance the current state of the art in distributed computing systems across the world by performing high quality research.
- Collaborate with industry experts to facilitate conferences.
- Train students and faculty in the complexities of open source software development, cross geo collaboration, and large scale software development.
- Support skill enhancement of students to make them industry ready.
- Support in professional skill development & continuous learning in collaboration with industry.
- Disseminate results of learning and research activities through publications, hands-on workshops etc.

11.5 School of Law (SoL)

The School of Law (SoL) is born out of a desire to provide quality legal education in India. It joins the existing five schools of RVU dealing with liberal arts and sciences, design, economics, business and computer science and engineering. Our students will be in a unique position to explore intersections between law and other disciplines such as business, economic, social sciences, technology, and public policy. This intersectional approach will help the students look at law with a broader lens.

Programmes

The School of Law offers two undergraduate programmes: B.A. LL.B. and B.B.A. LL.B. We also offer a postgraduate programme: LL.M. All the programmes are compliant with the BCI Rules of Education. In collaboration with other schools at RVU, our students will also have access to various interdisciplinary courses, which will give them varied perspectives to analyse legal issues, thus building on their critical analysis skills. The students will also have the opportunity to be a part of research centers and student clubs and societies.

B.A. LL.B. (Hons.)

Five-year Integrated B. A. LL B. (Hons.): The combination of law and humanities seeks to provide a rounded understanding of the legal discipline. This multidisciplinary approach will help develop essential skills like critical analysis, lateral thinking, research and writing, and problem-solving to name a few. Students will have the option to pursue their specific interests by opting for elective subjects of their choice. The combined knowledge of humanities and law is highly valued by law firms, NGOs, think tanks, legal aid clinics, and public prosecutors to name a few.

B.B.A. LL.B. (Hons.)

Five-year Integrated B.B.A LL.B. (Hons.): We are witnessing an unprecedented growth of start-ups in India and a budding culture of entrepreneurship. The integrated course in business administration and law aims to cater to the need of such times. Apart from gaining knowledge of law, students will also be learning about contemporary issues in business. This will be a valuable asset in today's growing market. Major corporate houses, law firms, multinational companies, start-ups particularly value these skills.

LL.M

Master of Laws (LL.M.): The LL.M. seeks to provide students with a specialised understanding of the law. Apart from the core courses, the students will have the opportunity to choose courses of their interest. This will allow them the flexibility to steer themselves in the direction of their specialization. The core courses will help deepen the existing knowledge of crucial legal concepts.

11.5.1 Research Centres

1. Centre for Human Rights Studies

Article 1 of the UDHR states that "All human beings are born free and equal in dignity and rights. They are endowed with reason and conscience and should act towards one another in a spirit of brotherhood." This is applicable to everyone, but in reality, this is only on paper. Many sections of society still cannot enjoy the full range of human rights on account of discrimination and misuse, and abuse of power.

Human rights are the cornerstone of a well-functioning democracy. There is hardly any need to overemphasize their importance. Poor legislative framework coupled with low levels of enforcement, lack of monitoring, poverty, conflict, climate change, corruption, and ignorance have wreaked havoc on the human rights of the citizens of India. The above, coupled with the Covid-19 outbreak has brought to light the poor governance issues, which have further exacerbated the sufferings of the masses. We at the CHRS seek to draw attention to the problems being faced by the people of India while also finding durable solutions that target the issues at their roots. Through our research, we would like to discuss pertinent theoretical issues while bringing human rights discussions to the broader community.

19. Hostel

We realize how difficult it can be for students to move away from the comfort of their homes and stay in a hostel. To make their stay as safe and comfortable as possible, we have provided a host of facilities and conveniences for our students. The number of students accommodated in a room depends in which semester the student is studying in. As the concentration and privacy required is more as students' progress from the first year to the final year, the type of accommodation also varies.

There is one common mess for all the boarders and healthy and tasty vegetarian food is served to them, in the Cauvery block. The boarders can also avail of sports, gymnasium and Wi-Fi facilities.

INDEPENDENT AUDITOR'S REPORT

To the members of Rashtreeya Sikshana Samithi Trust

Opinion

We have audited the financial statements of **R V University** ("The Institution"), which comprise the Balance Sheet as at 31st March, 2023 and the Income and Expenditure Account for the year then ended and notes to the financial statements, including a summary of significant accounting policies.

In our opinion and to the best of our information and according to the explanations given to us, the accompanying financial statements give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the trust as at March 31, 2023, and its deficit for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) issued by ICAI. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the entity in accordance with the Code of Ethics issued by ICAI and we have fulfilled our other ethical responsibilities in accordance with the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation of these financial statements that give a true and fair view of the state of affairs, results of operations and cash flows of the institution in accordance with the accounting principles generally accepted in India. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the institution's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the institution or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the institution's financial reporting process.

Auditor's Responsibilities for the Audit of Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Go to TABLE OF CONTENTS

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the institution's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the institution's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the institution to cease to continue as a going concern.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

7. Vice Chancellor's Message

"We want that education by which character is formed, strength of mind is increased, the intellect is expanded, and by which one can stand on one's own feet." - Swami Vivekananda. This is a very profound message from one of our finest spiritual gurus on the kind of education required in India and elsewhere. The Trustees of Rashtreeya Sikshana Samithi Trust (RSST) deserve to be applauded for their steadfast efforts in the field of education over the past eight decades and for taking a historic step by establishing the RV University. The RV University aspires to be a world-class university known for academic and research excellence, diversity, international collaborations, inter-disciplinary studies, sustainability, social commitment, and community engagement. In addition, RV University wishes to be a responsible, ethical, and collaborative partner to industry, government and other organizations to create a better world. We want to create an institution that can provide quality education at an affordable cost. We have, therefore, recruited excellent faculty members and non-teaching staff to inspire generations of students to come. As a part of our launch efforts, we have approached various dignitaries for a message for publication in this volume. We are pleasantly surprised by the warmth of many constitutional and statutory authorities, legal luminaries, academics and captains of industry. The alacrity with which some of them have responded is indeed laudable. We sincerely thank each one of them. We in fact deem the message of these stalwarts as a true blessing. We are greatly enthused by these inspiring messages even as we embark on a long journey. I hope this publication will serve as a constant reminder to all of us as to the l of ty standards that we have to attain in the years to come. I wish to sincerely thank the President, of fice bearers and all Trustees of RSST for their unstinting support in our endeavors. The small seed that they have planted today will, over the years, become a mighty tree and provide excellent learning opportunities for thousands of students. It is our sincere wish that these students will build a "New India" and make all of us proud.

11.1.1 Research Centers

1. Centre for Visual & Performing Arts

There was a time when every child from a middle-class home went to either a music or dance class. They took part in school skits or learnt to draw and paint. Every child invariably knew the folk song of the region or a bhajan and took part in folk dance in community festivals-gatherings. It was part of one's life. When it became part of the school timetable, it was called the co-curricular. Over the years, the structure of society changed, the idea of education changed, schools got re-organized into class categories, multi-channel television became the dominant voice of drawing rooms, and gradually co-curricular transformed into a hobby, something that you do if you have the 'free time'. With it, engagement with the 'local' or the 'here and now' of our cultural spaces moved to the periphery. Education subsequently was flagged as job-oriented and the absence of tangible benefits had little use.

In the bargain, we lost our collective unconscious — our languages, local art forms, richness of folk, handlooms and handicrafts. The Arts built bridges between people and ideas, it also represented the journey of a society and a nation. It gave us the ability to imagine a shared world and respond to human and civilizational crisis. If M.S. Subbalakshmi's music was Carnatic excellence to some, it was spiritual to others. To Gandhi and Nehru, it was a voice that could unite the country and lead it towards the dream of independence.

A study of the arts – music, dance, theatre, films and visual arts – provides historical and cultural perception of a country. Art is not insular but is profoundly impacted by the socio-political happenings of society. To study art, therefore, not only holds clues to the past, but has keys to handling the future. How people and society in different periods of time want to be remembered also embodies art practices. A study of the Arts is a study in sociology, history, politics and philosophy. By its very nature, it is interdisciplinary.

The collaborative nature of Performing Arts provides students opportunities to engage the mind, body and emotions. It helps them discover their own voice, develops confidence, and encourages them to act as ethical and responsible participants in citizenship. While the arts themselves overlap each other, it is also a study into histories, geographies, anthropologies, linguistics, cultural studies, feminisms, politics and patronage. How all these coalesce into creating the creative is a fascinating experience. Today, with technology at its peak, performing arts has entered an exciting phase – it offers new possibilities and provides access to the past and memory like never before.

The Centre is interested in the knowledge systems that constitute the Arts as well as practice-based research. It aspires to focus on socially relevant and participatory practices and encourages projects that investigate the nature of art and society. For instance, Kuchipudi's origins in a spiritual tradition, the coming together of activism, poetry and musical traditions in the ghazal, the diverse traditions of theatre that stemmed from mythology, religion, folk, politics and contemporary issues – the world of creative encounters the real.

The Centre believes in collaborating with the top cultural institutions, art and theatre schools, music sabhas, repertories, archives, major national and international festivals, museums, art galleries where our students will intern, and will also use their expertise to host workshops, Lecdems, conferences, and residencies. Leading performing artistes and scholars will be brought to the Centre for guest lectures. The Centre will offer a range of certificate courses, short-term courses, and weekend programmes that will provide intense learning opportunities to students and the community. Students who register for their doctoral studies will be able to work under practitioners who are also subject experts. The RV Institution, with its commitment to culture and the arts, will make the Centre a vibrant space of thought and action. Our courses are structured in a way that will offer sensory experience as well as aesthetic-stylistic and political-cultural awareness. We hope to facilitate critical thinking of cultures, both global and local. In the initial two years, the center will build a strong culture of 'thinking' through master classes, workshops and Lecdems. Once we create an ecosystem, the Centre will launch its Master's programme which will be interdisciplinary in nature.

After this insightful and solid grounding, there is little doubt that our students will be able to find before them an array of career possibilities. Some of them are:

- Critics/writers
- Performers
- Festival curators
- Museum curators
- Institution Founders
- Therapists
- Arts administrators
- Stage Managers
- Broadcast presenters
- Teachers

- Choreographers
- Community Art workers

2. Centre for Sustainable Development

The main objective of the masters Centre for Sustainable Development (CSD) is to incorporate knowledge from the biophysical and social sciences to better understand and engage with societal issues pertaining to the environment and development.

It is widely understood today that environmental issues cut across disciplinary divides. Thus, understanding and studying them, as well as educating a new generation calls for disciplinary and cross-disciplinary perspectives and openness to the varied frameworks, worldviews, and values about the environment. Furthermore, environmental conservation goals are often tightly tied to development goals. Thus, environmental science education needs awareness, appreciation, and knowledge about the social context of the environment. The centre looks to advance both the disciplinary and cross-disciplinary possibilities that can promote sustainable development without losing sight of environmental diversity, equity, and social and environmental justice.

Apart from holding activities at the university such as seminars, conferences, and workshops to achieve this end, the center looks forward to building synergies with like-minded stakeholders across academia, civil society, and public and private sectors for education, research, innovation, and action. The Centre stands for values such as trans disciplinarity, environmental diversity, sustainability, justice, inclusivity, and openness to diverse perspectives that will foster intellectual growth, education, and research.

11.3 School of Business (SoB)

The School of Business administration deals with the management of an organization's resources and time. It plays a pivotal role in ensuring that an organization is run effectively and efficiently. An effective business administration needs a combination of qualitative, quantitative, and soft skills as they deal with a plethora of problems. The opportunity to deal with pertinent issues and contribute to practice drives the discipline. Business administration as a discipline is not bound by existing extant theory. However, decisions need to be grounded in sound logic, which drives the need for a course in business administration. A degree in business administration empowers a degree holder with a versatile outlook and surfeit of tools to solve a problem with ingenuity and aplomb. Such a skill-set augurs well for the degree holder's future and enables her/him to contribute to the organization and society positively.

Programmes

Explore the various programmes offered at the School of Economics and Business that fulfill all academic and industrial requirements. Students are facilitated with classroom education, projects, research work, seminars, educational tours, workshops, and more to enhance their career prospects right from the beginning.

B.B.A. (Hons.)

At RV University, we strive to provide students with a holistic outlook on business administration discipline. We like to keep them abreast with the pertinent events so as to prepare them for the future. We encourage students to be curious and courageous to question the existing practices. We equip them with skill sets to help them deconstruct the existing policies and practices and reframe them for the current needs. RV university believes that change is the only constant and that one needs to at least keep pace with it. We do not limit our curriculum to the conventional courses seen across established institutes. Instead, we endeavour to expose students to contemporary issues such that they can be the harbinger of change that the industry desires. Our curriculum is designed so as to inculcate knowledge through practice and collaboration with industry and academic experts. We at RV University take due cognizance of a student's individuality and wish to aid them in their career growth.

The curriculum is built to provide a comprehensive understanding of the four pillars of Business Administration: Finance, Marketing, Entrepreneurship, and Business Analytics. Each of these pillars is offered to students to opt from as their major. However, in the spirit of providing freedom to the students, we do not limit a student to courses that they wish to major in. Additionally, we expose students to academic writings, digital literacy, and debates, which do not fall in the scheme of things in most of the schools across the nation.

The whole duration of the programme is divided into three major parts. The first year is devoted to building a liberal foundation of the students which holds the student in good stead for the future irrespective of the major or area that she/he opts for. The first half of the second year is devoted to the core of general management principles, which entails managerial economics, managerial accounting, operations management, and organizational behavior. The rest of the duration of the programme is devoted to the core topics of the specialization that a student wishes to major in. The last semester of the curriculum enables the students to go in-depth about the career track they wish to take up.

B. Com (hons.)

The B. Com (hons) programme at RV University has been specifically designed to create well-rounded and skill-oriented graduates supported by an interdisciplinary and experienced faculty. The B. Com (Hons) programme has been designed to keep in view the emerging business environment without missing fundamentals and it offers a multitude of sought-after specializations to support the individual talents and career needs of the aspirants. The interdisciplinary approach supported by a team of expert faculties ensures that the students have choices of subjects suiting their aspirations, without compromising on the quality. One of the core themes of the School of Business has been to co-create educational values and skills that the industry demands so that our students gain the potential of becoming well-placed in the financing industry. The course also offers an introduction to accounting, financing, and risk management fundamentals that can enable the students to face professional certification programmes. The University also facilitates students who wish to take up professional certifications through counseling and guidance. The highlights are: -

3. Centre for Computational Approaches to Science and Technology

The envisioned center will have multiple divisions, allied student clubs, dedicated faculty, research scholars, and undergraduate and master's students performing societal research. The center will be mandated to give a thrust to student entrepreneurship and application-oriented products. The center currently focuses on a) intellectual property protection (patents, GI, industrial designs, and trademarks); b) drug discovery and new drug development; c) undergraduate student research-games with purpose and d) training & entrepreneurship. All these divisions eventually envision to comprise of teaching assistants, research assistants, research associates, doctoral research scholars, allied faculty across schools, undergraduate students, student clubs, master's students, industry partners, collaborations through MOUs, and offer innovation, entrepreneurship & product development minor, and I&E courses.

Research Divisions

a. Intellectual property protection (PATENT/GI/DESIGN/TRADEMARK)

Any credible invention needs to be patent-protected, and the complexity of invention is increasing daily. In-house capability for IP training, drafting, and protection is needed. Secondly, sections 3a to 3p of Indian patent act 1970 are non-patentable subject matters in India and one of them interest to this group is section 3(k), the software inventions per se. The societal division of this will take up the Geographical indication (GI)-based community empowerment and outreach, and create empathy for India, its culture, and the need to empower fellow Indians through GI products. This division will be the single point of contact for entrepreneurs' IP needs.

b. Drug discovery and new drug development

Computational chemistry through methylene-linked molecules is the hope for the future. This division identifies possible combination drugs for evolving pathogens that comply with sections 3(d) and 3(e) of the patent act of India. The herbal & natural products of Indian origin will drive medical research of next century and there is increased consciousness of moving from active molecule isolation to possibility of natural product formulation either through food or herbal

supplements. The current small molecule drug discovery lacks tools for in silico evaluation of herbal formulations and there is a strong need for combination molecule evaluations. Also, the herbal formulations need to be reasoned and interpreted for activity and the machine learning and deep learning tools could interpret and identify new formulations for existing as well as newer health challenges. Anti-aging formulations and "Cleopatra" perfume are of interest to this division.

c. Undergraduate student research

This division focuses on breaking down complex problems into research that undergraduates can find interest in, conceive, be amenable to, and complete with a purpose or role for society. Games with purpose will be the pedagogical approach and look to build the capacity of entrepreneurial mindset among students. The division aims to promote faculty-student interaction for research, building a culture of problem discussion, rapid prototyping, adopting lean start-up strategies, adopting open-source projects, identifying specific external domain experts to guide projects, etc. The team imparts these techniques through gaming and gaming-based pedagogy and pushes students to aspire to deliver products in a minimalistic time. The team essentially innovates on pedagogy for technical entrepreneurship and looks to build a technical entrepreneurial support system for students.

d. Training & Entrepreneurship

India needs technology entrepreneurs at various levels, and building entrepreneurial skills at our university is a necessity that could serve as a differentiator. This also necessitates a focus on the creation of research & training facilities for Sc/ST students and evolving new research-driven opportunities for rural students. This center will invest 25% of its time in capacity building for students, scholars, and faculty, conducting external training and consultancy, and in due process, creating enough intellectual capability to produce successfully trained manpower and entrepreneurs stages of empathy, definition, ideation, prototype, and final testing. One of the initiatives is called "Counseling by Panchatantra," wherein students articulate a story for educational purposes and enable the generic sharing of knowledge regarding emotional, personal, career, and behavioral challenges that teenagers face during their studies.

4. Dhee Center for AI and Data Science

Dhee Center is an interdisciplinary research and education center focusing on the study, development and applications of advanced computational and statistical methods to extract knowledge and insights from large and complex data sets.

This involves developing algorithms and techniques in the fields of data mining, data visualization, and machine learning. including deep learning, computer vision, natural language processing, and reinforcement learning, and organizing conferences to disseminate the research results.

The academic focus would be on designing and developing curriculum and courses for:

- AI/ ML specialization courses for BTech Computer Science

This initiative contributes to the betterment of humanity in technological advancements by collaboration and research in IoT and edge computing which makes daily experiences more efficient and seamless. Exploring IoT applications leads to improved monitoring, diagnostics and personalized treatments for patients. The focus on assistive technologies helps individuals with disabilities, providing them tools and fulfilling their lives. Image processing contributes to humanity by revolutionizing biomedical research, security etc. by analysis of visual data. Computational offloading improves energy efficiency, performance and security and also improves resource access.

Internships:

Internships will be offered to interested students where focused problem definitions will be provided to them. Working on these problems will allow the students to work on a part of a larger research problem and equip them with technical and non-technical skills that are required in industry and academia.

e. Gaming, ERP & SAAS, sentiment analysis

India is undoubtedly one of the premier global destinations for supporting back-end operations. In this context, Enterprise Resource Planning (ERP) and Software as a Service (SaaS) stand out as the natural extensions, with a projected sustained demand. Our team has successfully crafted a standalone ERP tool, now readily available in the commercial market. We possess a comprehensive understanding of the entire process, starting from requirement collection and moving seamlessly through agile methodology to execution. What sets us apart in this domain is our distinctive approach, where we leverage the principles of design thinking and embrace the lean startup methodology. This unique combination allows us to offer innovative and effective solutions that cater to the evolving needs of our clients. We are "gaming with purpose" people, creating games in niche domains of project management, psychological metrics, niche job training, skill development, novel esports etc.

Activities to be Organized

a. I&E Courses: This center will monitor five new courses at SOCSE for undergraduates, namely:

- Structured Innovation: To see problem statements & understand empathy,
- Research & Publication Ethics: To perform technical prior art search,
- Entrepreneurial Mindset: To see money in problem statements, and
- Mentored Internship/ Summer Internship/ Winter Internship/ Industry Internship: Build that briefcase of documented achievements as a student.
- Innovation, Entrepreneurship & Product development Minor: About 58 students are pursuing this minor.

b. I&E Trainings:

This center believes in capacity building for student innovation and entrepreneurship. It develops and deploys patent drafting training for both internal and external students. The vision is to become a master training team for school students, internal and external innovators. The Atal Tinkering Labs (ATL) across schools are producing students with a consciousness of design thinking, and it is time for patent drafting to start from schools. So far, the center has trained 150 external students and 300 internal RVU students in innovation & entrepreneurship, and helped document over 90 student inventions or ideas.

c. Games with Purpose:

It is anticipated that about 30% of entrepreneurs in this world are in the gaming domain. It is considered lucrative and a low-hanging fruit for testing entrepreneurial waters. Moreover, fields such as education, psychology, management, family bonding, deaddiction, counseling, etc., are being reimagined with gaming. SOCSE students have built over 50 games with similar purposes and allied problem statements. This center will continue to inculcate the habit of seeing India-specific problems and societal challenges as opportunities to nurture future innovators.

d. Geographical Indication (GI) Research:

Companies trademark their products to help customers recognize them, build their brand, and run advertising campaigns and promotions. But what about Indian farmers, artisans, weavers, or tribals? Who will advertise their products? Who will project the societal benefits, improve their livelihoods, increase their sales, create new markets, and develop empathy? Interestingly, there is an intellectual property tool similar to a trademark available for these vulnerable classes,

called geographical indication (GI), based on the product's uniqueness connected to geography. China has over 8,000 GIs, while India has only around 400 registered GIs. SOCSE has initiated publishing blogs and research papers about GI, and this is done through students to make a positive impact on society. We have completed a GI product survey for over 10 GI products and aim to build a portfolio of potential GI products to aid in the grant of GI for them. After all, GI is a tool to empower our farmers, weavers, small businesses, artisans, tribals, and monetize India's 3,000-year-old heritage, science, and culture.

e. Undergraduate Research & Innovation:

Western society continues to remark that Indian research is non-transitional and mostly directed towards publications. If meaningful research is to be conducted at a university, undergraduates need to be empowered to develop inventions. At the center, we conducted a one-month boot camp for potential student entrepreneurs to build their capacity in this direction. Over 30 students have worked on:

- the development of automated stock market trading tools,
- GI product empathy,
- IPR templates for trainings, and
- identifying university activities that could use SAAS tools.

Some of the tools of this initiative are at different stages of empathy, definition, ideation, prototype, and final testing. One of the initiatives is called "Counseling by Panchatantra," wherein students articulate a story for educational purposes and enable the generic sharing of knowledge regarding emotional, personal, career, and behavioral challenges that teenagers face during their studies.

8. Center for IOT and Edge Computing

In the pursuit of technological advancement, the Centre for IoT and Edge Computing envisions a future where innovation empowers humanity to thrive. This center is proposed as a dynamic hub that brings together visionary leaders, pioneering researchers, industry experts, and passionate enthusiasts to address the challenges and opportunities presented by the convergence of IoT and Edge Computing technologies.

The group will identify use cases, develop prototypes, and customize solutions that will make it faster, easier, and more cost effective in the areas of industrial IOT, healthcare, smart city, smart office, smart farming, smart energy, smart home and assistive technologies.

In the growing and evolving technological landscape, the convergence of IoT and Edge Computing has ignited a revolutionary change with the potential to extensively transform industries and daily lives. To harness the power of the stated topics, the Center for IoT and Edge Computing is introduced. Events

LogicBegin

The Chip Tech Students Club at RVU organized the LogicBegin event on October 25th, 2023, as a part of the Center for IoT and Edge Computing. The targeted audience for this event comprised first-semester students enrolled in the B.Tech. programme at the School of Computer Science and Engineering. The event aimed to enhance their practical skills in preparation for the laboratories integral to the Digital Systems and Computer Architecture (DSCA) course.

Participants had the opportunity to interact with basic electronic components, immersing themselves in the realm of digital logic. Third-semester SoCSE students took on the roles of mentors and guides, ensuring that the participants were familiar with the components, addressing questions, and exchanging ideas to prepare them for upcoming labs.

The course mandated students to delve into IC fundamentals and demonstrate the construction of logic circuits. Additionally, they learned how to utilize logic gates and ICs to build Boolean expressions, ranging from basic to complex. This insightful experience proved crucial for beginners' early engineering careers, serving as a real eye-opener.

11.6 School of Law (SoL)

The School of Law (SoL) is born out of a desire to provide quality legal education in India. It joins the existing five schools of RVU dealing with liberal arts and sciences, design, economics, business and computer science and engineering. Our students will be in a unique position to explore intersections between law and other disciplines such as business, economic, social sciences, technology, and public policy. This intersectional approach will help the students look at law with a broader lens.

Programmes

The School of Law offers two undergraduate programmes: B.A. LL.B. and B.B.A. LL.B. We also offer a postgraduate programme: LL.M. All the programmes are compliant with the BCI Rules of Education. In collaboration with other schools at RVU, our students will also have access to various interdisciplinary courses, which will give them varied perspectives to analyse legal issues, thus building on their critical analysis skills. The students will also have the opportunity to be a part of research centers and student clubs and societies.

B.A. LL.B. (Hons.)

Five-year Integrated B. A. LL B. (Hons.): The combination of law and humanities seeks to provide a rounded understanding of the legal discipline. This multidisciplinary approach will help develop essential skills like critical analysis, lateral thinking, research and writing, and problem-solving to name a few. Students will have the option to pursue their specific interests by opting for elective subjects of their choice. The combined knowledge of humanities and law is highly valued by law firms, NGOs, think tanks, legal aid clinics, and public prosecutors to name a few.

B.B.A. LL.B. (Hons.)

Five-year Integrated B.B.A LL.B. (Hons.): We are witnessing an unprecedented growth of start-ups in India and a budding culture of entrepreneurship. The integrated course in business administration and law aims to cater to the need of such times. Apart from gaining knowledge of law, students will also be learning about contemporary issues in business. This will be a valuable asset in today's growing market. Major corporate houses, law firms, multinational companies, start-ups particularly value these skills.

LL.M

Master of Laws (LL.M.): The LL.M. seeks to provide students with a specialised understanding of the law. Apart from the core courses, the students will have the opportunity to choose courses of their interest. This will allow them the flexibility to steer themselves in the direction of their specialization. The core courses will help deepen the existing knowledge of crucial legal concepts.

11.5.1 Research Centers

1. Centre for Human Rights Studies

Article 1 of the UDHR states that “All human beings are born free and equal in dignity and rights. They are endowed with reason and conscience and should act towards one another in a spirit of brotherhood.” This is applicable to everyone, but in reality, this is only on paper. Many sections of society still cannot enjoy the full range of human rights on account of discrimination and misuse, and abuse of power.

Human rights are the cornerstone of a well-functioning democracy. There is hardly any need to overemphasize their importance. Poor legislative framework coupled with low levels of enforcement, lack of monitoring, poverty, conflict, climate change, corruption, and ignorance have wreaked havoc on the human rights of the citizens of India. The above, coupled with the Covid-19 outbreak has brought to light the poor governance issues, which have further exacerbated the sufferings of the masses. We at the CHRS seek to draw attention to the problems being faced by the people of India while also finding durable solutions that target the issues at their roots. Through our research, we would like to discuss pertinent theoretical issues while bringing human rights discussions to the broader community.

Apart from providing insight into the field of human rights law, the CHRS would also like to be a dedicated platform for debates and discussions. We would like to act as a forum that fosters critical thinking on the part of students and faculty at RVU, as well as scholars and practitioners from other institutions. We believe that knowledge of human rights is vital for the holistic growth of the students so that they can be socially conscious and just human beings.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the entity to cease to continue as a going concern.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

INDEPENDENT AUDITOR'S REPORT

To the members of Rashtreeya Sikshana Samithi Trust

We have audited the financial statements of **R V University** ("Institution"), which comprise the Balance Sheet as at 31st March, 2022 and the Income and Expenditure Account for the year then ended and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the institution as at March 31, 2022, and of its financial performance for the year then ended in accordance with the Accounting Standards issued by the Institute of Chartered Accountants of India (ICAI).

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) issued by ICAI. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the institution in accordance with the Code of Ethics issued by ICAI and we have fulfilled our other ethical responsibilities in accordance with the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation of these financial statements that give a true and fair view of the state of affairs, results of operations and cash flows of the institution in accordance with the accounting principles generally accepted in India. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the institution's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the institution or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the institution's financial reporting process.

Auditor's Responsibilities for the Audit of Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Go to TABLE OF CONTENTS

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the institution's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the institution's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the institution to cease to continue as a going concern.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

INDEPENDENT AUDITOR'S REPORT

To the members of Rashtreeya Sikshana Samithi Trust

Opinion

We have audited the financial statements of **R V University** ("The Institution"), which comprise the Balance Sheet as at 31st March, 2023 and the Income and Expenditure Account for the year then ended and notes to the financial statements, including a summary of significant accounting policies.

In our opinion and to the best of our information and according to the explanations given to us, the accompanying financial statements give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the trust as at March 31, 2023, and its deficit for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) issued by ICAI. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the entity in accordance with the Code of Ethics issued by ICAI and we have fulfilled our other ethical responsibilities in accordance with the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation of these financial statements that give a true and fair view of the state of affairs, results of operations and cash flows of the institution in accordance with the accounting principles generally accepted in India. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the institution's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the institution or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the institution's financial reporting process.

Auditor's Responsibilities for the Audit of Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Go to TABLE OF CONTENTS

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the institution's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the institution's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the institution to cease to continue as a going concern.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

INDEPENDENT AUDITOR'S REPORT

To the members of Rashtreeya Sikshana Samithi Trust

Opinion

We have audited the financial statements of **R V University** ("The Institution"), which comprise the Balance Sheet as at 31st March, 2024 and the Income and Expenditure Account for the year then ended and notes to the financial statements, including a summary of significant accounting policies.

In our opinion and to the best of our information and according to the explanations given to us, the accompanying financial statements give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the trust as at March 31, 2024, and its surplus for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) issued by ICAI. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the entity in accordance with the Code of Ethics issued by ICAI and we have fulfilled our other ethical responsibilities in accordance with the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation of these financial statements that give a true and fair view of the state of affairs, results of operations and cash flows of the trust in accordance with the accounting principles generally accepted in India. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the entity's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the entity or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the entity's financial reporting process.

Auditor's Responsibilities for the Audit of Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Go to TABLE OF CONTENTS

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the entity to cease to continue as a going concern.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

SDI

Redefining Design Education

Established in 2021, the School of Design and Innovation (SDI) is more than a teaching (and placement) machine. It is populated by learners and teachers who enjoy experimentation, inquiry, risk taking, collaborative learning and evidence-based research and decision making. We see design as ethical, inclusive, and democratic; and as an act, a product, an experience, and above all, a mindset.

The School of Design and Innovation is driven by

- An integrated approach to sustainability and caring for life and climate;
- The desire to play a central role in shaping discourse around transdisciplinary and inclusive approaches to design;
- The need to make sense of emergent knowledge paradigms and technologies in/for India.

SDI adopts an integrated approach to learning, which draws upon the fields of art, architecture, design, science, humanities, social science, engineering, economics, and other fields, and expects that its graduates will similarly find their place in a hybrid, fluid domain of action and intervention – as design practitioners, strategists, researchers, advisors, academics, and entrepreneurs.

SDI engages with industry in order to positively impact industry from within the academic space, as well as orient its students to being professionally and emotionally ready to be a part of the design industry and make lasting contributions as design thought leaders.

Subhiksha Prakash
(SoLAS, Batch 2023)

SoLAS has not only been an enriching academic journey, but more so of an orientational shift. From being a passive consumer of knowledge, to actively engaging in critical thinking, I have come a long way. The professors' expertise and passion for their subject makes you want to learn more and more. Their interactive approach has allowed me to deeply immerse myself in the subjects and understand real life implications. I have loved and enjoyed every unique assignment that is just the perfect blend of creativity, conceptual understanding and critical thinking.

Studying at RV University as a design student offers a vibrant and dynamic learning environment, fostering creativity and innovation. Students can put their ideas to life in the state-of-the-art design studios that are furnished with cutting-edge equipment. Insights from the real world are enhanced by industry collaborations and guest lectures by seasoned professionals, readying students for the competitive design scene.

Harshitha Suresh

Yashaswini A
(SoB, Batch 2024)

RV University goes beyond academics, fostering resilience and mental well-being through its dedicated counselling services. The library, a state-of-the-art facility, is a haven for knowledge seekers, with its expansive resources and world-class amenities.

The hallmark of RV University's unique approach to education lies in its dynamic Wednesday sessions, featuring CXO talks and Fireside Chats. These interactions with industry leaders elevate our learning experience, offering us a firsthand perspective of the corporate world.

While searching for a college, RVU stood out because of its unique combination of Economics and Data Analytics. The curriculum is thoughtfully designed, offering both theoretical foundations and practical applications, giving me a deeper understanding of how data influences economic decisions and policies. I am particularly excited about the hands-on experience I will acquire through data analysis projects that are directly linked to real-world economic problems. Moreover, RVU also places a strong emphasis on developing soft skills such as communication, teamwork, and leadership abilities—skills that are crucial for success in any career.

Swachhta Hi Seva Campaign – Event Report 2024

The NCC RVU recently organized the "Swachhta Hi Seva" campaign to commemorate the 10th anniversary of the Swachh Bharat Abhiyan, and we were thrilled to have cadets from RVCE join us in this important initiative. This event not only showcased the dedication of young people to environmental stewardship but also fostered a spirit of community involvement through a series of well-coordinated activities.

1. Cleanliness Drive in Campus (30 SEP 2024)

The campaign began with a spirited litter-picking event on campus, where cadets displayed remarkable enthusiasm and selfless dedication to their community.

Their collaborative efforts exemplified unity and a shared mission to enhance the campus environment. Collecting garbage from various locations throughout the campus not only enhanced the aesthetic appeal of the surroundings but also fostered a sense of responsibility among participants.

Go to TABLE OF CONTENTS

जाएगा—क्योंकि न्यायालय के निर्णय एवं अन्य कानून तथा नियमों द्वारा उस कानूनी ढाँचे में लगातार संशोधन होता रहेगा जिनके अनुसार अधिनियम लागू किया जाना है;

(2) उच्चतर शैक्षिक संस्थानों का कार्यकारी प्राधिकारी द्वारा अधिदेशात्मक रूप से पूरा समर्थन किया जाना चाहिए तथा यह देखा जाना चाहिए कि आई.सी.सी. की सिफारिशों का क्रियान्वयन समयबद्ध रूप से किया जा रहा है कि नहीं। आई.सी.सी. के प्रकार्य के लिए समस्त संभावित संसाधन उपलब्ध कराए जाने चाहिए— जिनमें कार्यालय और भवन अवसंरचना सहित (कम्प्यूटर, फोटो कॉपियर, श्रव्य दृश्य उपकरणों आदि) स्टाफ (टाइपिस्ट, सलाह एवं कानूनी सेवाओं) सहित पर्याप्त रूप में वित्तीय संसाधन का आबंटन भी हो;

(3) असुरक्षित/दुर्बल वर्ग विशेष रूप से प्रताड़ना के शिकार बन जाते हैं और उनके द्वारा शिकायत करना और भी ज्यादा कठिन होता है। क्षेत्र, वर्ग, जाति, लैंगिक प्रवृत्ति, अल्पसंख्यक पहचान, एवं पृथक रूप से सामर्थ से असुरक्षा सामाजिक रूप से संयोजित हो सकती है। समर्थकारी समितियों को इस प्रकार की असुरक्षितताओं के प्रति अति संवेदनशीलता एवं विशेष जरूरतों के प्रति संवेदनशील होने की आवश्यकता है;

(4) क्योंकि शोध छात्र और डॉक्टोरल छात्र विशेष रूप से आक्रान्त होते हैं, अतः उच्चतर शैक्षिक संस्थानों द्वारा यह सुनिश्चित कराया जाए कि शोध सर्वेक्षण की नैतिकता संबंधी दिशा निर्देश उचित रूप से लागू हो रहे हैं;

(5) समस्त उच्चतर शैक्षिक संस्थानों द्वारा उनकी लैंगिक उत्पीड़न विरोधी नीति की क्षमता का नियमित रूप से अर्ध वार्षिक पुनरीक्षण किया जाना चाहिए;

(6) सभी अकादमिक स्टाफ कॉलेजों (जिन्हें अब मानव संसाधन विकास केन्द्रों के रूप में पाया जाता है) (एचआरडीसी) और क्षमता निर्माण के क्षेत्रीय केन्द्रों द्वारा लिंग संबंधी सत्रों को अपने अभिमुखी एवं पुनश्चर्या पाठ्यक्रमों में निगमित करना चाहिए। अन्य सब विषयों से भी इसे प्राथमिकता दी जाए तथा इसे मुख्य धारा के रूप में विशेष रूप से बनाया जाए तथा इसके लिए "यूजीसी सक्षम" रिपोर्ट का उपयोग करें जिसमें, इस बारे में, प्रविधियाँ उपलब्ध कराई जाती हैं;

(7) उच्चतर शैक्षिक संस्थानों में प्रशासकों के लिए संचालित अभिमुखी पाठ्यक्रमों में आवश्यक रूप से लैंगिक संवेदीकरण तथा लैंगिक उत्पीड़न की समस्याओं पर एक मापदण्ड होना चाहिए। उच्चतर शैक्षिक संस्थान के समस्त विभागों में मौजूद सदस्यों के लिए कार्यशालाएँ नियमित रूप से संचालित की जानी चाहिए;

(8) समस्त उच्चतर शैक्षिक संस्थानों में परामर्श सेवाओं को संस्थानों के अन्तर्गत रखा जाना चाहिए और इसके लिए सुप्रशिक्षित पूर्णकालिक परामर्शदाता होने चाहिए;

(9) कई उच्चतर शैक्षिक संस्थान जिनके विशाल परिसर हैं जिनमें प्रकाश संबंधी व्यवस्था बहुत अधूरी है तथा अन्य संस्थानों के लोगों के अनुभव अनुसार वे स्थान असुरक्षित समझे जाते हैं, वहाँ पर्याप्त प्रकाश व्यवस्था अवसंरचना एवं रख—रखाव का एक अनिवार्य अंग है;

(10) पर्याप्त एवं अच्छी तरह से प्रशिक्षित सुरक्षा स्टाफ आवश्यक रूप से होना चाहिए जिसमें महिला सुरक्षा स्टाफ सदस्य अच्छी संख्या में हों, जिससे संतुलन बना रहे। सुरक्षा स्टाफ नियुक्ति के मामले में लैंगिक संवेदनशीलता प्रशिक्षण को एक शर्त के रूप में माना जाना चाहिए;

(11) उच्चतर शैक्षिक संस्थान आवश्यक रूप से विश्वसनीय जन यातायात को सुनिश्चित करें— विशेष रूप से उच्चतर शैक्षिक संस्थानों के विस्तृत परिसरों के अन्दर विभिन्न विभागों के मध्य जैसे— छात्रावासों, पुस्तकालयों, प्रयोगशालाओं तथा मुख्यालय और विशेष रूप से वे स्थान जिन तक पहुँच पाना दैनिक शोधकर्ताओं के लिए कठिन है। सुरक्षा की कमी तथा उत्पीड़न बहुत बढ़ जाता है जब कर्मचारी और छात्र सुरक्षित जन यातायात पर निर्भर नहीं रहते हैं। कर्मचारी एवं छात्रों द्वारा पुस्तकालयों और प्रयोगशालाओं में देर रात तक काम करने और शाम के समय अन्य कार्यक्रमों में भाग लेने के लिए उच्चतर शैक्षिक संस्थानों द्वारा भरोसेमंद यातायात का प्रबन्ध किया जाना चाहिए;

(12) आवासीय उच्चतर शैक्षिक संस्थानों द्वारा महिला छात्रावासों की संरचना को प्राथमिकता दी जाए। महिला छात्रावास, जो सभी प्रकार के उत्पीड़न से थोड़ी बहुत सुरक्षा प्रदान करते हैं, उस उच्च शिक्षा के सभी स्तरों पर, शहरी एवं ग्रामीण क्षेत्रों में बड़ी संख्या में उच्च शिक्षा इच्छुक युवा महिलाओं के लिए अत्यन्त जरूरी है;

Go to TABLE OF CONTENTS

(13) युवा छात्रों की तुलना में छात्रावास में स्थित छात्राओं की सुरक्षा के मामले को भेदभाव पूर्ण नियमों का आधार नहीं बनाया जाना चाहिए। परिसर की सुरक्षा संबंधी नीतियों को महिला कर्मचारी एवं छात्राओं की सुरक्षात्मकता के रूप में नहीं बन जाना चाहिए, जैसे कि आवश्यकता से अधिक सर्वेक्षण या पुलिसिया निगरानी अथवा आने जाने की स्वतंत्रता में कटौती करना– विशेषकर महिला कर्मचारी एवं छात्राओं के लिए;

(14) सभी उच्चतर शैक्षिक संस्थानों के लिए पर्याप्त स्वास्थ्य सुविधायें होनी अधिदेशात्मक हैं। महिलाओं के विषय में इस प्रक्रिया में लिंग संवेदी डाक्टर और नर्सें तथा इसके साथ ही एक स्त्री रोग विशेषज्ञ की सेवाएँ उपलब्ध होनी चाहिए;

(15) महाविद्यालयों में महिला विकास प्रकोष्ठ पुनः चालू किये जाने चाहिए एवं उन्हें धन दिया जाना चाहिए और इन्हें लैंगिक उत्पीड़न विरोधी समितियों तथा आन्तरिक शिकायत समिति के प्रकार्यों से पृथक करके स्वशासी रखा जाना चाहिए। उसके साथ ही वे आन्तरिक शिकायत केन्द्रों के परामर्श से अपनी गतिविधियाँ विस्तारित करेंगे जिनमें लैंगिक संवेदीकरण कार्यक्रम शामिल हैं तथा नियमित आधार पर लैंगिक उत्पीड़न विरोधी नीतियाँ परिसरों में प्रचारित प्रसारित करेंगे। "सांस्कृतिक पृष्ठभूमि" एवं "औपचारिक अकादमिक स्थल" इन्हें परस्पर सहभागिता करनी चाहिए ताकि ये कार्यशालाएँ नवोन्मेषी, आकर्षक बने एवं मशीनी न हों;

(16) छात्रावासों के वार्डन, अध्यक्ष, प्राचार्यों, कुलपतियों, विधि अधिकारियों एवं अन्य कार्यकारी सदस्यों को नियमों के अथवा अध्यादेशों में संशोधनों द्वारा जबाबदेही के दायरे में यथाआवश्यक रूप से लाना चाहिए;

4. शिकायत समाधान तन्त्रः–

(1) लैंगिक उत्पीड़न के विरुद्ध प्रत्येक कार्यकारी प्राधिकारी लैंगिक संवेदीकरण के लिए एक आन्तरिक तन्त्र सहित एक आन्तरिक शिकायत समिति (आई.सी.सी.) का गठन करेंगे। आई.सी.सी की निम्न संरचना होगीः–

(अ) एक पीठासीन अधिकारी जो एक महिला संकाय सदस्य हो और जो एक वरिष्ठ पद पर (एक विश्वविद्यालय की स्थिति में प्रोफेसर से निम्न न हो तथा किसी महाविद्यालय की स्थिति में सह–प्रोफेसर अथवा रीडर से निम्न न हो) शैक्षिक संस्थान में नियुक्त हो तथा कार्यकारी प्राधिकारी द्वारा नामित होः

बशर्ते यदि किसी स्थिति में कोई वरिष्ठ स्तर की महिला कर्मचारी उपलब्ध नहीं है तो पीठासीन अधिकारी को उप–अनुभाग 2(ओ) में दर्शाये कार्यस्थल के अन्य कार्यालय अथवा प्रशासनिक एकांश से उन्हें नामित किया जाएगाः

"बशर्ते यदि उस कार्यस्थल के अन्य कार्यालयों अथवा प्रशासनिक एकांशों में कोई वरिष्ठ स्तर की महिला कर्मचारी नहीं है तो अध्यक्ष अधिकारी को उसी नियोक्ता के कार्यस्थल से अथवा किसी अन्य विभाग या संगठन में से नामित किया जा सकता है"

(ब) दो संकाय सदस्य एवं दो गैर–अध्यापनरत कर्मचारी जो अधिमानतः महिलाओं की समस्याओं के लिए प्रतिबद्ध है तथा जिन्हें सामाजिक कार्य अथवा कानूनी जानकारी है, उन्हें कार्यकारी प्राधिकारी द्वारा नामित किया जाना चाहिए;

(स) यदि किसी मामले में छात्र शामिल हैं तो उसमें तीन छात्र हों जिन्हें स्नातक पूर्व, स्नातकोत्तर एवं शोधस्तर पर क्रमशः भर्ती किया जायेगा जिन छात्रों को पारदर्शी लोकतांत्रिक प्रणाली द्वारा चुना गया है;

(द) गैर सरकारी संगठनों में से किसी एक में से अथवा किसी ऐसी सभा में से जो महिलाओं की समस्याओं के लिए प्रतिबद्ध हैं या एक ऐसा व्यक्ति हो जो लैंगिक उत्पीड़न से जुड़े मामलों का जानकार हो, जो कार्यकारी प्राधिकारी द्वारा नामित हो;

(2) आन्तरिक शिकायत समिति के कुल सदस्यों में न्यूनतम आधे सदस्य महिलायें होनी चाहिए;

(3) उच्चतर शैक्षिक संस्थानों में वरिष्ठ प्रशासनिक पदों पर नियुक्त व्यक्ति जैसे कुलपति, पदेन कुलपति, रेक्टर, कुलसचिव, डीन, विभागों के अध्यक्ष आदि आन्तरिक समिति के सदस्य नहीं होंगे ताकि ऐसे केन्द्र के प्रकार्य की स्वायत्तता सुनिश्चित रहे;

Go to TABLE OF CONTENTS

(4) आन्तरिक शिकायत समिति के सदस्यों की सदस्यता अवधि तीन वर्ष की होगी। उच्चतर शैक्षिक संस्थान ऐसी एक प्रणाली का उपयोग करें जिसके द्वारा आन्तरिक शिकायत केन्द्र के सदस्यों का एक तिहाई भाग प्रतिवर्ष परिवर्तित होता रहे;

(5) आन्तरिक समिति की बैठक आयोजित करने के लिए जो सदस्य गैर सरकारी संगठनों अथवा सभाओं से संबद्ध हैं उन्हें कार्यकारी प्राधिकारी द्वारा ऐसे शुल्क अथवा भत्ते का भुगतान किया जाए, जैसा निर्धारित किया गया है;

(6) जिस स्थिति में आन्तरिक समिति का अध्यक्ष अधिकारी अथवा इसका कोई सदस्य, यदि:—

(अ) अधिनियम की धारा 16 के प्रावधानों का उल्लंघन करता है, अथवा

(ब) वह किसी अपराध के लिए दोषी सिद्ध हुआ है अथवा उसके विरुद्ध वर्तमान में लागू किसी कानून के अन्तर्गत किसी अपराध के बारे में कोई पड़ताल लम्बित है, अथवा

(स) किसी अनुशासनात्मक कार्यवाही के तहत वह दोषी पाया गया है अथवा उसके विरुद्ध कोई अनुशासनात्मक कार्यवाही लम्बित है, अथवा

(द) उसने अपने पद का दुरुपयोग इस सीमा तक किया है कि कार्यालय में उसकी सेवामें निरन्तरता को जनहित के प्रतिकूल माना जाएगा;

harassment, contact details of members of Internal Complaints Committee , complaints procedure and so on. Any existing body already functioning with the same objective (like the Gender Sensitization Committee Against Sexual Harassment (GSCASH)) should be reconstituted as the ICC;

(n) treat sexual harassment as a violation of the disciplinary rules (leading up to rustication and expulsion) if the perpetrator is a student;

(p) monitor the timely submission of reports by the ICC;

(q) prepare an annual status report with details on the number of cases filed and their disposal and submit the same to the Commission.

3.2 **Supportive measures**.—(1) The rules, regulations or any such other instrument by which ICC shall function have to be updated and revised from time-to-time, as court judgments and other laws and rules will continue to revise the legal framework within which the Act is to be implemented.

(2) The Executive Authority of the HEIs must mandatorily extend full support to see that the recommendations of the ICC are implemented in a timely manner. All possible institutional resources must be given to the functioning of the ICC, including office and building infrastructure (computers, photocopiers, audio-video, equipment, etc.), staff (typists, counselling and legal services) as, well as a sufficient allocation of financial resources.

(3) Vulnerable groups are particularly prone to harassment and also find it more difficult to complain. Vulnerability can be socially compounded by region, class, caste, sexual orientation, minority identity and by being differently abled. Enabling committees must be sensitive to such vulnerabilities and special needs.

(4) Since research students and doctoral candidates are particularly vulnerable the HEIs must ensure that the guidelines for ethics for Research Supervision are put in place.

(5) All HEIs must conduct a regular and half yearly review of the efficacy and implementation of their anti-sexual harassment policy.

Go to TABLE OF CONTENTS

(6) All Academic Staff Colleges (now known asHuman Resource Development Centres (HRDCs) and Regional Centres for Capacity Building (RCCBs) must incorporate sessions on gender in their orientation and refresher courses. This should be across disciplines, and preferably mainstreamed using the UGC SAKSHAM Report which provides indicative modules in this regard.

(7) Orientation courses for administrators conducted in HEIs must have a module on gender sensitization and sexual harassment issues. Regular workshops are to be conducted for all sections of the HEI community.

(8) Counselling services must be institutionalised in all HEIs and must have well trained full-time counsellors.

(9) Many HEIs having large campuses have a deficit in lighting and are experienced as unsafe places by the institutional community. Adequate lighting is a necessary aspect of infrastructure and maintenance.

(10) Adequate and well trained security including a good proportion or balance of women security staff is necessary. Security staff must receive gender sensitization training as a part of conditions of appointment.

(11) HEIs must ensure reliable public transport, especially within large campuses between different sections of the HEI, hostels, libraries, laboratories and main buildings, and especially those that do not have good access for day scholars. Lack of safety as well as harassment is exacerbated when employees and students cannot depend on safe public transport. Reliable transport may be considered by HEIs to enable employees and students to work late in libraries, laboratories and to attend programmes in the evenings.

(12) Residential HEIs should accord priority to construction of women's hostels. For the growing population of young women wishing to access higher education, hostel accommodation is desirable in both urban and rural areas and at all levels of higher education which provides a modicum of protection from harassment of all kinds.

(13) Concern for the safety of women students must not be cited to impose discriminatory rules for women in the hostels as compared to male students. Campus safety policies should not result in securitization, such as over monitoring or policing or curtailing the freedom of movement, especially for women employees and students.

(14) Adequate health facilities are equally mandatory for all HEIs. In the case of women this must include gender sensitive doctors and nurses, as well as the services of a gynaecologist.

(15) The Women's Development Cells in colleges shall be revived and funded to be able to carry out the range of activities required for gender sensitizationand remain autonomous of the functioning of anti sexual harassment committees and ICCs. At the same time they shall extend their activities to include gender sensitization programmes in consultation with ICCs and help to disseminate anti-sexual harassment policies on campuses on a regular basis. The 'cultural' space and the 'formal academic space' need to collaborate to render these workshops innovative, engaging and non-mechanical.

(16) Hostel Wardens, Provosts, Principals, Vice Chancellors, Legal Officers and other functionaries must be brought within the domain of accountability through amendmentsin the rules or Ordinances where necessary.

4. **Grievance redressal mechanism.**—(1) Every Executive Authority shall constitute an Internal Complaints Committee (ICC) with an inbuilt mechanism for gender sensitization against sexual harassment. The ICC shall have the following composition:-

(4) The term of office of the members of the ICC shall be for a period of three years. HEIs may also employ a system whereby one –third of the members of the ICC may change every year.

(5) The Member appointed form amongst the non-governmental organizations or associations shall be paid such fees or allowances for holding the proceedings of the Internal Committee, by the Executive Authority as may be prescribed.

(6) Where the Presiding Officer or any member of the Internal Committee:

(a) contravenes the provisions of section 16 of the Act; or
(b) has been convicted for an offence or an inquiry into an offence under any law for the time being in force is pending against him; or
(c) he has been found guilty in any disciplinary proceedings or a disciplinary proceeding is pending against him; or
(d) has so abused his position as to render his continuance in office prejudicial to the public interest,

such Presiding Officer or Member, as the case may be, shall be removed from the Committee and the vacancy so created or any casual vacancy shall be filled by fresh nomination in accordance with the provisions of this section."

5. **Responsibilities of Internal Complaints Committee (ICC) -** The Internal Complaints Committee shall:

(a) provide assistance if an employee or a student chooses to file a complaint with the police;
